# Catax Grant Services

Assisting businesses to identify, apply and manage UK and EU grant funding.

In the UK & Europe there are many funding bodies such as Innovate UK, Local Enterprise Partnerships & Horizon 2020.

Catax help businesses to navigate the grant landscape and identify the most appropriate grant funding.

Once a funding option has been identified, our team of expert bid writers work with the client

to extract all the relevant and necessary information to make a strong & compelling application.

Having worked in grant funding for a number of years, the team understand how the application process works, the do's and don'ts, the timeframe and project management needed to ensure clients maximise their chances of being successful.

*"No matter how well you understand your business and future innovation goals, applying for grants is an art form which requires specialist skills to work through the application process and to present your case in a way that satisfies the assessors. Before working with the Catax team I had tried and failed with a number of grant applications, however since engaging with their team has seen my success rate reach around 50% proving the value of having expert assistance in this process."*

**Paul Willacy, Compact Syngas Solutions, Founder & MD**

*"The expertise and insight of Catax was invaluable to lead us through the Government grant application process. I was confident of success based on their input, and we were delighted when the results came in."*

**Antony Quinn, Maverick Aviation, CEO**

# What Grant Funding Can I Receive?

Grant funding levels can vary for a number of reasons, such as different funding bodies, sectors, product/service development stage and geographical location to name but a few.

**Example:** SMART is Innovate UK's "Open grant funding" programme, which is open to all sectors and funding can range from £25,000 to £2,000,000.

**SMART Project Size:** Projects with durations of between 6 and 18 months must have total eligible project costs between £25,000 and £500,000. Projects between 19 months and 36 months must have total eligible project costs between £25,000 and £2 million and must be collaborative.

**SMART Funding Levels:** For feasibility and industrial research projects (TRL 3-5), an SME is eligible for up to 70% funding or for experimental development projects (TRL 5-6) which are nearer to market, an SME can have eligible project costs of up to 45%. Medium and large company funding is also available at a lower rate.

## Costs You Can Include in a SMART Grant Claim:

Labour (PAYE)

Materials

Sub-Contracts

Capex

IP costs

Travel
